

### **Medical Policy Change Requests**

Reconsideration of our corporate position will be made if, or when, published peer-reviewed scientific literature supporting its efficacy becomes available.

To request a change in corporate position, please email your Provider Relations account specialist with the exact nature of the request (the change that you are advocating) and include supporting documentation. The request will benefit from as much detail as possible including the Corporate Medical Protocol name (if applicable), associated CPT codes, supporting published medical evidence as well as FDA approval information or opinions from professional organizations.

To assist with your request, please review our “Technology Assessment and Medically Necessary Services Protocol” for the criteria utilized in the evaluation of new technology or new applications to existing technology.
