

Annual wellness visits: Your opportunity to earn more

What are annual wellness visits?

An annual wellness visit is a comprehensive analysis and exam that enables you to deliver more efficient, quality care.

By using Vatica's Well365 tool when you conduct your annual wellness visits, you can provide enhanced care.

An annual wellness visit includes:

- Review of medical and family history
- Medication and provider update
- Height, weight, BMI, blood pressure, and other routine measurements
- Identification of cognitive impairments
- Personalized health advice
- Identification of risk factors and treatment options
- A 10-year screening schedule (which is created automatically for you)
- CPT-II code entry
- Computer-assisted diagnostic coding

Who can perform annual wellness visits?

- Physician (doctor of medicine or osteopathy)
- Physician's assistant (recommended)
- Nurse practitioner (recommended)
- Clinical nurse specialist

What's in it for your patients?

After we receive your claim for a patient's annual wellness visit, we will send the patient a \$20 Prepaid Card.

What's in it for you?

You earn \$150 for each annual wellness visit you perform and \$200 when you combine the annual wellness visit with a preventive annual physical.

Conduct your annual wellness visits using Vatica's Well365 tool and earn \$350 per AWW or \$400 when you combine the AWW with a preventive annual physical.*

** This reimbursement information is based on the standard Medicare fee schedule. If you have questions about your fee schedule, please contact your Provider Practice Consultant.*

And because the Well365 tool helps us capture ICD-10 codes, you'll receive fewer chart review requests.

To get started

Vatica offers a no-cost 30-minute webinar on Well365 that you or someone from your staff can attend. We also offer onsite training at your office.

Through our Jump Start Program, we can also help you with:

- Patient eligibility verification and appointment scheduling
- Loading patient demographic information
- Entering pertinent medical and prescription history, including lab and test results
