## Breast Cancer Screening

**Description**: Women age 50 to 74 who had at least one screening or diagnostic mammogram

**Exclusions**: Bilateral mastectomy

**Timeframe**: October 1, 2014 – December 31, 2016

**Compliance/Codes**: CPT: 77055, 77056, 77057

**Helpful tips**
- Access processes to ensure a mammogram is ordered and performed; processes should include referrals, reminders and tracking
- Conduct annual wellness visits (AWVs) and review preventive care plan with patients
- Check MRM™ quality gap report for noncompliant patients

## Colorectal Cancer Screening

**Description**: Members age 50 to 75 who had appropriate screening for colorectal cancer

**Exclusions**: Colorectal cancer

**Timeframe**: FOBT: January 1, 2016 – December 31, 2016 (1 year)

**Compliance/Codes**: CPT: 88270 & 82274

**Helpful tips**
- Clearly document patients with exclusions
- Ensure documentation in medical records include month, year, and results
- Conduct AWVs and review preventive care plan with patients.
- Check MRM™ quality gap report for noncompliant patients

## Adult BMI Assessment

**Description**: Members age 18 to 74 who had an outpatient visit and whose body mass index (BMI) was documented

**Exclusions**: 21 and older: January 1, 2015 – December 31, 2016

**Timeframe**: 20 and younger: January 1, 2015 – December 31, 2016

**Compliance/Codes**: ICD10: Z68.1, Z68.20 – Z68.39, Z68.41 – Z68.45

**Helpful tips**
- For a compliant patient, use ICD-10 codes for BMI and submit through regular claim submission
- Documentation in the medical record must include the weight, height, and BMI value (turn on BMI calculation in EMR system)

## Osteoporosis Management

**Description**: Women age 67 to 85 who suffered a fracture and had a bone mineral density test or prescription to treat osteoporosis in the six months after the fracture

**Exclusions**: Members who had a BMD test 24 months prior to fracture

**Timeframe**: New fracture occurred between July 1, 2015 – June 30, 2016

**Compliance/Codes**: CPT: 76977, 77078, 77080– 77082 & 77085

**Helpful tips**
- Use the correct diagnosis codes for treatment of a fracture. Claims with codes for new fractures pull patients into the measure; you should not use new fracture diagnosis codes for patients in the recovery or healing phase
- Codes for traumatic, pathologic, or stress fractures should be reserved for when the patient is receiving active treatment for the fracture, such as surgical treatment or an emergency department encounter
- Standard orders for bone density for all women that meet the criteria
- Ask your patient whether or not they had a fracture since last office visit
